Goals & Mission

The Society of Hispanic Professional Engineers and Latinos in Science and Engineering (SHPE/MAES) is the nation's largest association fostering Hispanic leadership in STEM. We strive to empower students from middle school to college to realize their fullest potential and to impact the world through STEM (Science, Technology, Engineering, Mathematics) bringing education, training, volunteering opportunities, community, and access to the single largest national organization of Hispanic members, professionals, and supporters. SHPE/MAES strives to promote, cultivate, and honor excellence in education and leadership among Hispanic engineers and scientists.

We aim to equip students with the right tools to get the most out of college professionally and otherwise through:

1. Awareness: bringing Hispanic/Latin American culture to campus, mentoring students in high school, outreach, and volunteering in STEM.
2. Support: the largest network of Hispanic students on campus, community bonding, academic mentorship, social community, and personal support.
3. Development: workshops on personal finance, networking, resume building, activism, and socially-bonded growth.

Our members are actively passionate about SHPE as we strive to create a community in everything we do. Be it through creating a SHPE pipeline by mentoring underserved high schooler students through our SHPE Jr. and MentorSHPE programs, or creating an environment for members to express themselves and our Hispanic heritage through Salsa Nights. We are an active community on campus of the most active voices, driven by high-achieving students and deeply community-driven leaders at CU Boulder. We are leaders aware and conscious that our impact on each other helps us overcome the challenges of getting our STEM degrees, be it financial, interpersonal, or systematic challenges, we arise STRONGER, together.

Will you join our mission?

Our Team

Student Officers

President: Kevin Sanchez
Year Four: Information Science
Email: president.shpemaescub@gmail.com

Vice-President: Eduardo Lopez Landeros
Year Four: Aerospace Engineering
Email: vpprograms.shpemaescub@gmail.com

Professional Development Chair: Nallely Saucedo
Year Four: Chemical Engineering
Email: professionalchair.shpemaescub@gmail.com

Public Relations: Felipe Garza Cancino
Year Four: Aerospace Engineering
Email: profficer.shpemaescub@gmail.com

Secretary: Rachel Zamora
Year Four: Biomedical Engineering
Email: shpe.maes.cuboulder@gmail.com

Webmaster: Ulises Cortez
Year Three: Computer Science
Email: N/A

Historian: Isai Marcial
Year Two: Mechanical Engineering
Email: historian.shpemaescub@gmail.com

Academic Chair: Jose Alberto Saucedo
Year Four: Mechanical Engineering
Email: dlcrepandac.shpemaescub@gmail.com

Outreach Coordinator: Alan Ayala
Year Three: Computer Science
Email: N/A

Treasurer: Bernadette Weigang
Year Four: Aerospace Engineering
Email: vpfinance.shpemaescub@gmail.com

Social Media: Fernanda Arias Aguilar
Year Three: Architectural Engineering
Email: socialmediacoor.shpemaescub@gmail.com

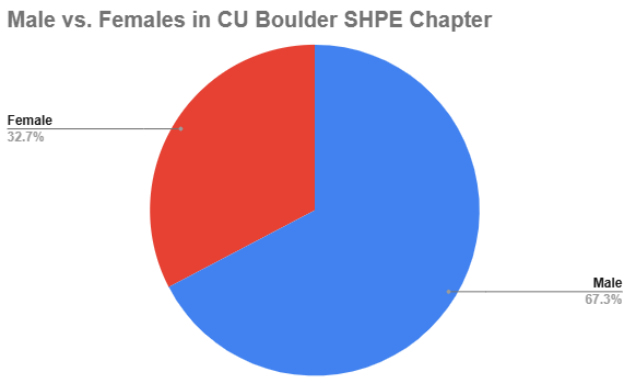
Member Engagement: Ari Quezada Caro
Year Four: Chemical and Biological Engineering
Email: dlcrepandac.shpemaescub@gmail.com

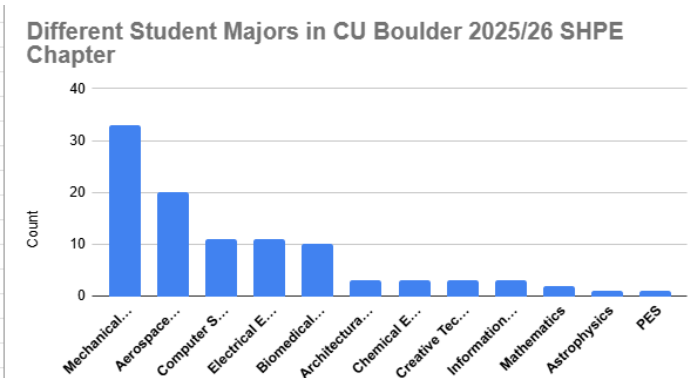
Academic Advisor

Francisco López Jiménez. is an Associate Professor in Aerospace Engineering Sciences at the University of Colorado Boulder, where he is part of the Aerospace Mechanics Research Center (AMReC) focusing on Structural and Material Systems. He earned his Engineering Degree in Mechanical Engineering from the University of Seville (2006) and his M.Sc. (2007) and Ph.D. (2011) in Aeronautics from the California Institute of Technology. Before joining CU Boulder in 2017, Dr. López Jiménez held postdoctoral positions at École Polytechnique in France and at the Massachusetts Institute of Technology. His research explores deployable structures, composite materials, slender structures and soft solids, with emphasis on instabilities, buckling, and pattern formation. His work has been recognized with the Young Researcher Award at the 2012 European Solid Mechanics Conference and a graduate fellowship from the Keck Institute for Space Studies at Caltech. At CU Boulder, he is deeply committed to advancing aerospace engineering and mentoring the next generation of scientists and engineers.outreach to underserved minorities.

Student Demographics

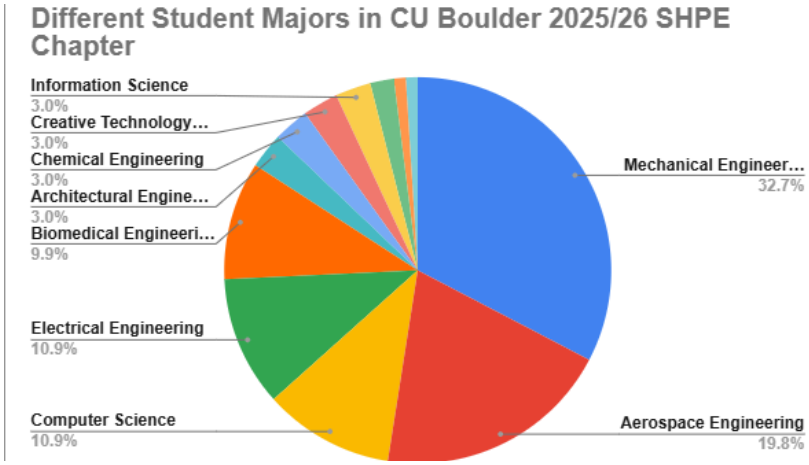
Major Statistics:
Utilizing the data from our current members for the 2025 academic year we can conclude which majors our chapter consists of. Across the board, we have students in each of the engineering majors offered here at CU Boulder. However, we primarily have students in Mechanical, Aerospace, and Computer Science.





Currently, we are standing at a ratio of 32.7% women for the 2025-26 academic year. We are actively encouraging new students to join our society while also trying to increase this ratio. Promoting women in STEM is one of our main focuses, and we are actively promoting opportunities for them along with providing resources.

Major Rankings:
1. Mechanical Engineering
2. Aerospace Engineering
3. Computer Science
4. Electrical Engineering
5. Biomedical Engineering
6. Architectural Engineering
7. Chemical Engineering
8. Civil Engineering
9. Creative Technology & Design
10. Information Science
11. Other
12. Exploratory Studies



Events

Conventions

NILA:
(National Institute for Leadership Advancement) is a leadership development conference built to aid SHPE's chapter leaders with the skills and knowledge for success in which we learn leadership strategies, recruitment, fundraising, chapter management, business, and interpersonal skills.

National Convention:
The SHPE National Convention is the country's largest gathering of Hispanic STEM students and professionals, with more than 15,000 attendees each year. Participants are given the unique opportunity to attend expert panels, technical workshops, engineering competitions, and interview with industry-leading companies & graduate schools.

Outreach

SHPE Jr.:
We prepare the future STEM pipeline by providing STEM opportunities and mentoring for youth in high school. We provide role models for young students to see others like them succeeding in engineering fields through campus visitation programs, SHPE Jr., pre-college symposiums and workshops, and MentorSHPE. MentorSHPE, is a sustained virtual mentorship program for high schoolers to introduce them to STEM topics.

Partnership Levels

Bronze (Cash Value $500 to $1000)

- Acknowledgement on SHPE social media platforms.
- Logo placed on SHPE: Boulder Website for the duration of one academic semester.
- Thank you mention at all SHPE Boulder general meetings for one academic semester.

Silver (Cash Value $1000 to $5000)

- All of the above.
- Logo placed on SHPE - Boulder Website for the duration of one academic year.
- Opportunity to include a company blurb & job opportunities in our weekly newsletter to SHPE Boulder members for one academic semester.

Gold (Cash Value > $5000)

- All the above.
- Resume/CV book of SHPE - Boulder members.
- Exclusive opportunity to host an information session for SHPE Boulder members.

Gifting Instructions

Should you decide to gift us by using the website or by mailing the check, please contact our CU Advancement team for further instructions, any additional questions, and to inform us of your gift.

Questions: email giving@cu.edu or call 303-541-1290

Should you or your company be inspired to donate, please use this https://giveto.colorado.edu/campaigns/50245/donations/new?a=9939692&amt=
In the gift designation box search for “Society of Hispanic Professional Engineers/Latinos in Science and Engineering Fund”

Or mail a check, payable to “University of Colorado Foundation”: College of Engineering & Applied Science c/o Advancement 422 UCB Boulder, CO 80309

On the check memo, please indicate “SHPE/MAES CU Boulder Chapter” SHPE/MAES will receive your donation through the CU Foundation, and you will receive a tax receipt.
